User Story #48

As a seller I wish to be able to list books so that users can buy them

Given that I'm a seller that wishes to sell a book, when I submit an add book request and it is valid then the book is added to the store

Given that I'm a seller that wishes to sell a book, when I submit an add book request and it is invalid then I am notified that it is incorrect

	Test One: navigating to add book

A screenshot of a web browser displaying the Bookcrun website. The browser's address bar shows 'bookcrun.com'. The website has a dark header with the Bookcrun logo and navigation links: 'All Books', 'Add Book', and 'Create Book'. There are also buttons for 'Sign In' and 'Register'. The main content area features a blurred background image of a bookshelf. Overlaid on this image is the text 'Welcome to Bookcrun' in a stylized font, with 'Welcome to' in yellow and 'Bookcrun' in blue.
