User Story #52

As an unregistered user I wish to be able to sign up to website so that I can be a registered user

Given that a user attempts to register, and they have not filled in the correct fields, then the register request is denied

Given that a user attempts to register, and they have filled in the form correctly, then they are sent to the books page logged in through the register's success page

Given that a user attempts to register, and they have already registered, then the register request is denied

Test Case	Browser: Brave
	Date/Time: 17/09/21 1:15 PM
	Tester: Matthew Woolley
	From the web page going to register by clicking the register button
	 Test 1: with no fields selected, the register page should show the user some kind of error
