User Story #45

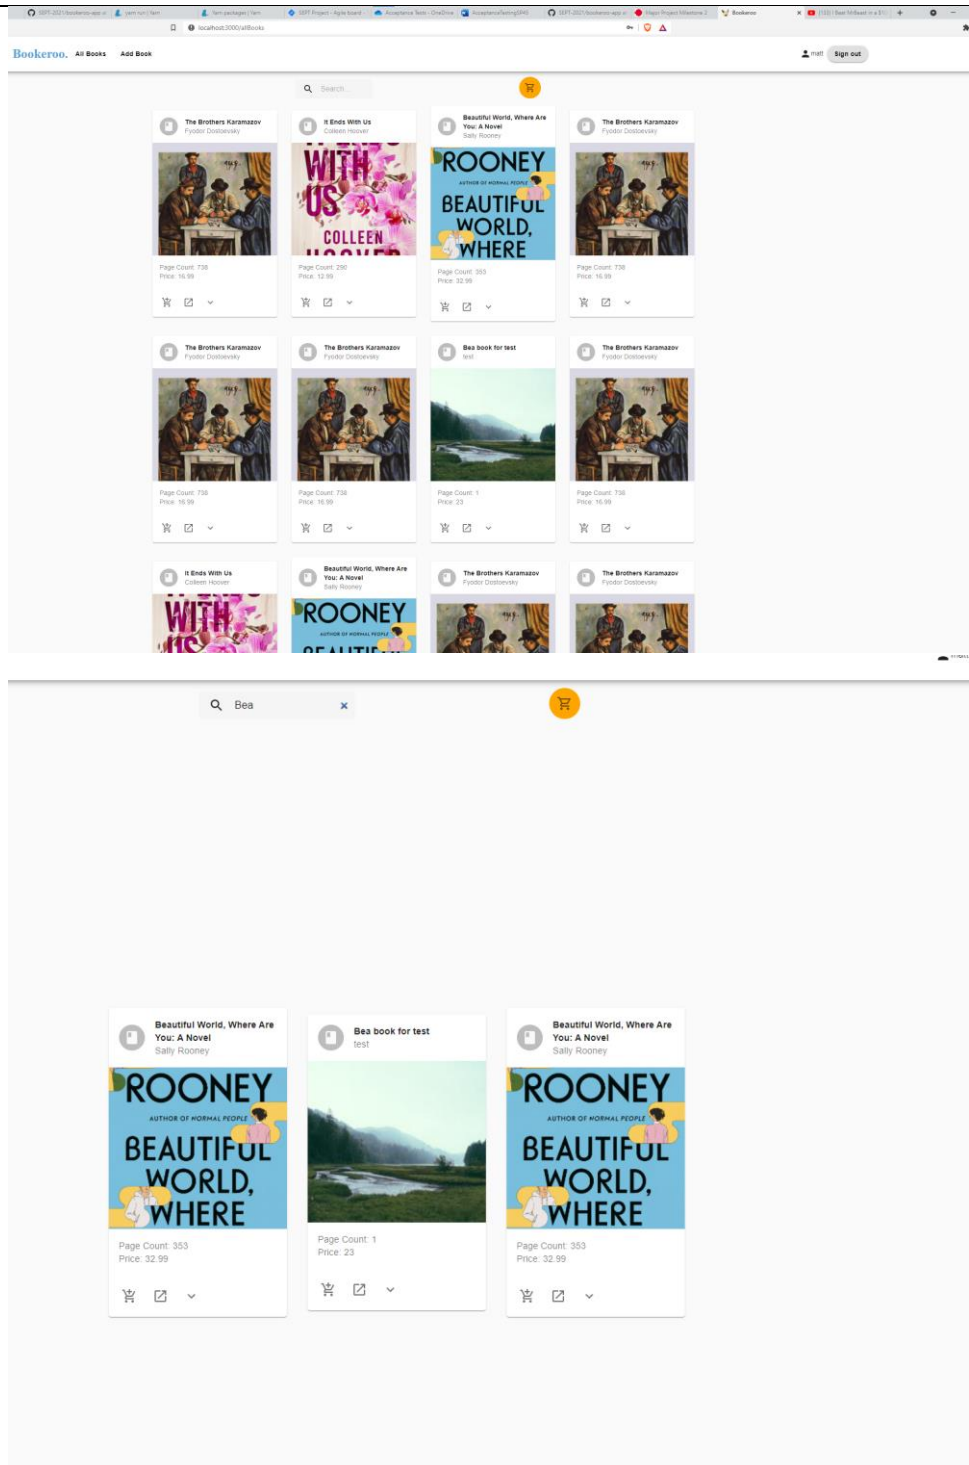

As a User, I'd like to search by title so that I can find books I wish to read

Given that a user searches for a keyword, when multiple books with the same key word exists, then all should be returned to the user

Given that a user searches for a title, when only one book in the database has that title, then all should be returned to the user

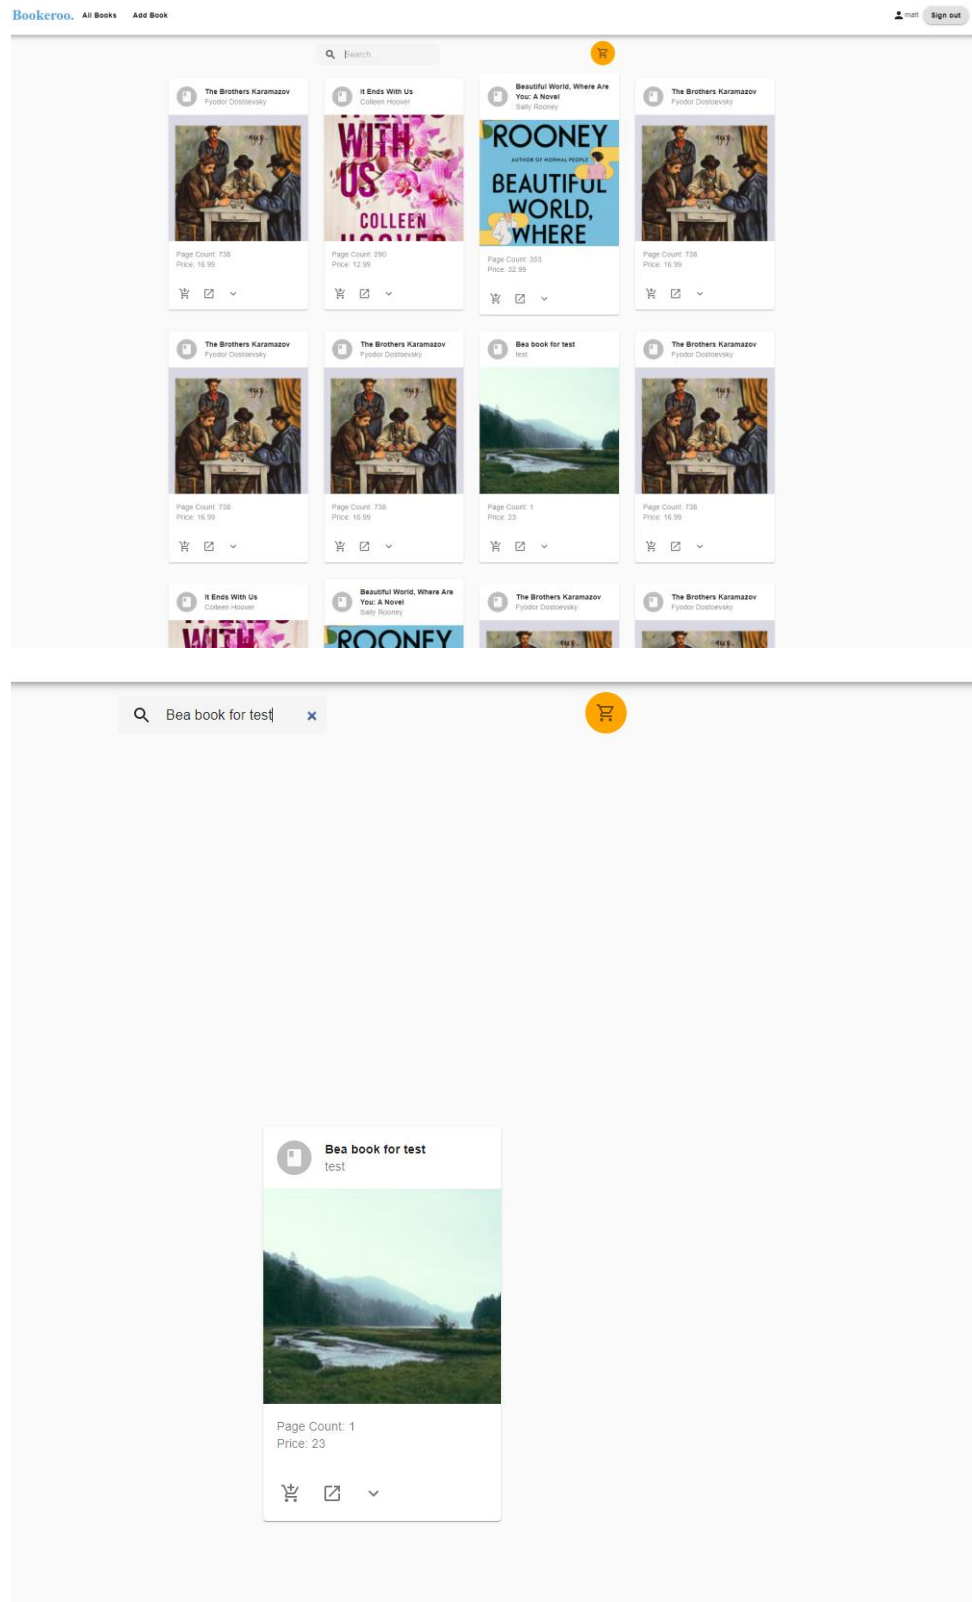

Given that a user searches for a title, when no books in the database has that title, then no books should be returned to the user

Test Case	Browser: Brave
	Date/Time: 17/09/21 4:33 PM
	Tester: Matthew Woolley
	Test 1: go to all books
	
From all books search bea as 3 books have that key word, 2 with different titles	

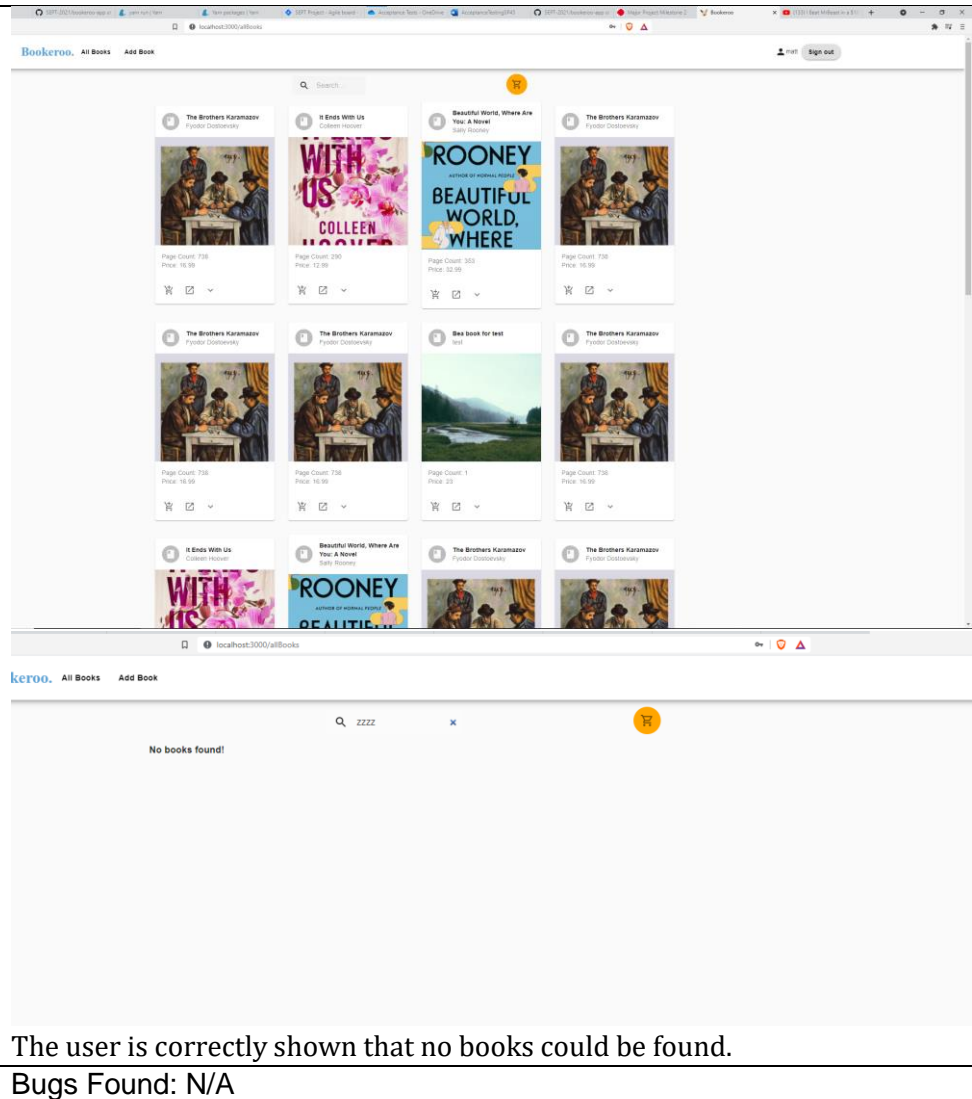

The user is displayed the correct information

Test 2: from all books again search **Bea book for test** and now only the test book should be shown

The user is correctly displayed the right book
Test 3: searching zzzz should return no books, from all books again

The user is correctly shown that no books could be found.

Bugs Found: N/A
